

WONDER Email Marketing has more features than we could list here (without putting you to sleep). Here are what we consider the most important:

- Advanced Email Editor-send messages as all text or graphical HTML.
- Schedule mailings to go out when you want, not when you have time to do them.
- Safe storage and maintenance of your important contacts and addresses. We back them up daily even if you don't.
- Track responses to your mailings with easy to read reports and statistics.
- Automated handling of subscriptions. Current subscribers can automatically remove themselves without bothering you. New subscribers can be added automatically through your website.
- Last Minute Preview-Calm your nerves by seeing what your email will look like before you send.
- Online service that delivers professional results without having to have a professional on staff.
