

Each time you access a file through your web browser, the browser caches (stores) it. In this way, the files (including any images on the page) do not have to be retrieved anew from the remote web site each time you click the **Back** or **Forward** buttons. You should periodically clear the cache to allow your browser to function more efficiently.

If you do not see instructions for your specific version or browser, search your browser's **Help** menu for "clear cache".

Internet Explorer 7

1. From the **Tools** menu, select **Internet Options...**.
2. Choose the **General** tab.
3. Under **Browsing history**, click **Delete...**.
4. Next to "Temporary Internet Files", click **Delete files...**.
5. Click **Close**, and then click **OK** to exit.

Firefox 3 for Windows

From the **Tools** menu, select **Clear Private Data**, and then check **Cache**. Click **Clear Private Data Now**.

Safari

1. From the **Safari** menu, select **Empty Cache...**.
2. When prompted, click **Empty** to confirm that you want to empty the cache.

Firefox 3 for Mac OS X

1. In Firefox, from the **Tools** menu, select **Clear Private Data**.
2. Make sure **Cache** is checked, and then click **Clear Private Data Now**.
